

Presentation

Teams will have a **total of 10 minutes** for the presentation including a recording of the solution (code part - up to 2 minutes). Professional attire is required. After presenting, teams will have 10 minutes for Q&A from the audience.

The presentation can include the following sections. Sections marked with * are required:

- Vision and plan*
 - Explain why?*
 - Target audience*
- Relevant competitive analysis and existing research*
- Comparison with old website if applicable*
- Lo-fi wireframes*
- Key feedback/ issues highlighted during user testing and how you worked to address them. Including statistics and pictures here would be a great addition.*
- Refined mid- or hi-fi wireframes*
- Demo of your responsive website or app* (recorded - up to 2 minutes)
- Possible extensions of the project and reflections

Note: Please include the name, major and year for each team member on the first slide and mention those details in your personal introductions at the very beginning of the presentation.

Solution Recording and requirements

This submission requires a demo of the developed pages (with code) with or without narration.

For the final report/ project outcome, teams must use Bootstrap as a framework for all their pages, and consequently, pages must be responsive. Teams are expected to write the code for:

- at least 2-3 pages of the website for pages with medium to high content density and/ or complexity with several components (at least 3) implemented such as carousel, navbar, breadcrumb, and

tabs. Advisor approval is needed for these components.

OR

- at least 5-6 pages of the website for pages with low to very low content density and/ or complexity with several components (at least 3) implemented such as carousel, navbar, breadcrumb, and tabs. Advisor approval is needed for these components.

If you are not sure what is required of your team, contact the advisor or TAs. The teams must use Bootstrap as a framework for all their pages. Your solution must be complete at this point.
